## Help and Feedback

If you would like to learn more about the new BrightAuthor features described below, please download the [User Guide](#). If you are new to BrightAuthor, you can also visit the [Training](#) page. If you have any questions, please contact us at [support@brightsign.biz](mailto:support@brightsign.biz).

## Changes Since 4.4.0.10

### Bug Fixes

- Setting up a BSN player with Remote Snapshot disabled no longer prevents you from editing the player from the **Manage > Status** tab.

- Adding videos to a BrightWall presentation from the Windows explorer no longer prevents the presentation from being uploaded to BSN.
- Media List, Image List, Video List, and Audio List states now correctly send zone messages when the **Populate from data feed** option is selected.
- Changing the order of audio and video files in a Media List and republishing the presentation no longer causes the audio file to loop infinitely.
- Attempting to publish a 1x1 BrightWall presentation via Local File Networking no longer raises an error in BrightAuthor.
