

BRIGHTAUTHOR RELEASE NOTES

Version 4.7.0.13

BrightAuthor Requirements

- PC with Windows Vista, Windows 7, Windows 8, or Windows 10—plus Microsoft .Net Framework 4.6 or later
- BrightSign XTx43, XDx33, HDx23, LS423, HO523, HS123

Minimum Firmware Required: 6.2.39

- BrightSign 4Kx42, XDx32, XDx30, HDx22, HDx20, LSx22, AU320

Minimum Firmware Required: 5.1.33

Changes Since 4.7.0.8

Important: *BSNEE 4.4 does not support the "Match All Media Tags to Player Tags" option for Tagged Playlists with this version of BrightAuthor. This option will be supported in the next version of BSNEE.*

Improvements

- When a BSN device setup package is included with a presentation, the presentation will play while BSN content is downloaded. Previously, the presentation would only play if there was no network connection.
- Media End events can now be assigned to Live Video states. The event will trigger if the HDMI input has disappeared for 6 seconds or if the sample rate changes during playback.

Bug Fixes

- 29442: RSS feeds items that lack a <guid> element no longer cause the player to crash.

- 29107: Presentation playback no longer stops when it encounters an MRSS feed with content that has not downloaded correctly.
- 28871: An issue with custom BSN device setup files has been fixed.
