

A portable tabletop display tower delivering digital signage where it is most needed.

The BrightSign TD1012 solid-state tabletop display is a freestanding, portable display that doesn't require a PC, external power or wiring. Engineered to meet the high standards in quality and reliability, the BrightSign TD1012 features an attractive yet durable steel enclosure with a built-in 12.1" high resolution screen and solid-state media player. Because it is battery operated, it can be placed exactly where signage is most needed such as retail merchandise tables and check-out counters. And its wireless networking keeps content fresh and relevant. With the BrightSign TD1012, getting your message out just got easier, more reliable and more portable.
